Direction for question nos. 21 to 25 :

Read the following passage carefully and answer the questions given below it. Certain words/phrases are in the bold to help you to locate them while answering some of the questions.

The importance of early detection of tuberculosis (TB), regular treatment and nutritious food are just not known widely enough. Often TB victims discontinue the treatment when the symptoms disappear, without waiting for a complete cure; the next attack is more virulent from bacteria which have thus become drug-resistant. Anti-TB drugs are produced in India. The capability to meet the country's requirements of anti-TB drugs in full exists. Yet millions of Indians suffer from TB and thousands of them die every year. Voluntary organizations and government agencies are doing commendable work. But we have so far tackled only the fringe of the problem. What is now needed is a nation-wide determination to fight TB. India eradicated smallpox with a national campaign. We can eradicate TB too.

21. Treatment is discontinued by TB victims, when:
 A) they think that the disease is completely cured
 B) the apparent signs of TB are no longer visible to them
 C) they run out of resources like money or medicine
 D) they are attacked by drug-resistant bacteria
22. Millions of Indians suffer from TB, because
 A) people discontinue the treatment too soon or do not start the treatment early enough
 B) India does not produce anti-TB drugs of the required quality
 C) anti-TB drugs are not available at a reasonable price
 D) people do not have nutritious food
23. When the treatment of TB is discontinued too early
 A) the old symptoms reappear
 B) the patient gradually gets better, although slowly
 C) the disease appears in a new, more dangerous form
 D) the patient must get good, nutritious food
24. 'The fringe of the problem' means
 A) the basic cause of the problem
 B) the root of the problem
 C) the side effects of the drugs
 D) the edge of the problem, not the main point
25. Who or what become 'drug-resistant', according to the passage?
 A) TB patients who are treated for a long time
 B) People who do not want to take medicine for their illness
 C) TB bacteria that have not been fully eradicated
 D) Patients who have discontinued the treatment
